Round 2 data QA, Q4:
Of answers with notes, ecosystem(s) selected, 2020−04−15

Black text = entered note, ordered on y alphabetically to compare systems selected

Figure: Horizontal stacked bar chart. Y-axis: ResponseId. X-axis: count. Legend (Ecosystem): Agricultural/Rural, Coastal, Freshwater, Other, Terrestrial, Urban.

Row labels (top to bottom):
- Wetland
- Wetland
- tidal salt marsh
- terrestrial−riparian (water basin)
- stream benthic community
- specifically, streamflow within a watershed
- Simulation of urban environments in a rural experimental setting
- Simulated terrestrial
- salt marsh
- salmon habitat, appears to be river systems, but have fisheries expert confirm freshwater selection
- Riparian zone
- peri−urban
- peri−urban
- peri−urban
- natural forest and agricultural
- microcosm
- Lake
- Laboratory
- its not really based in an ecosystem, its human communities
- greenroof
- greenhouse
- grassland
- grassland
- described as silvo−pastoral
- brackish wetlands at river delta
- Agroforests
- Agroforestry
- Agroecosystem
